

Testimony of Clyde G. Byerly
House Bill 384

The provisions of this proposed legislation to allow concealed carry in various facilities that are now excluded by the law will not benefit anyone but a small minority of firearms owners.

During the process to write and current law, various law enforcement agencies and business requested that concealed carry not be allowed in certain facilities for safety reasons. The restrictions in the current law were added to the bill and it became a law with bi-partisan support.

If the law is revised to accommodate a small minority of firearms owners, It will alienate a large number of business and law enforcement agencies.

The current law is working and has adequate provisions for persons to protect their persons and businesses.

I urge the Committee to table this proposed legislation.

Signed
Clyde G. Byerly
